

STOP 24/7 SURVEILLANCE ON PSYCHIATRIC WARDS

#StopOxevision

WHAT IS OXEVISION?

- Surveillance tech rolling out across NHS psychiatric wards, incl. children's wards.
- In theory, monitoring vital signs & improving safety; in reality, 24-hr cameras in patients' bedrooms with poor informed consent & data management.
- A private company's product costing the NHS £££.

We hear from abuse survivors retraumatised by OxeVision; people sleeping on bathroom floors to avoid these cameras; people given no chance to give/withdraw consent.

WHAT CAN I DO ABOUT IT / WHO ARE YOU?

We are a group of current and former psych patients calling for a halt to this and other surveillance tech in psychiatric care. You can help by:

- signing our petition to NHS England
- joining our mailing list
- finding out more at linktr.ee/stopoxevision
