

Oxehealth Clinical Subgroup
Wednesday 29 March 2023
15:00 pm to 16:00 pm
Via Teams

1.	<u>Apologies for Absence</u> Tom Hooper, Yvonne Rutherford, Kerrie Bennett <u>Present</u> Bill Kay, Group Nurse Direct (Chair) Julie Stewart, Personal Assistant (Minutes) Heather Common, Clinical Manager Sean Palmer, Clinical Nurse Lead Ailsa Jones, Ward Manager Sarah Jamieson, Project Support Officer Kirsty Charlton, Associate Director Charlene Stewart, Clinical Manager Reshma Haskins, Customer Success Manager Anna Papan, Customer service Associate Emma Hetherington, Ward Manager Francesca Storey, Ward Manager Marie Smith, Associate Nurse Director Emily Ranson, Ward Manager Andrea Cox, Associate Director Eve Henderson, Ward Manager Sally Vine, Associate Nurse Director	<u>Action by Chair</u>
2.	<u>Minutes from Previous Meeting</u> Not discussed	Chair
3.	<u>Recap and Documents for reference:</u> • Action Log – BK & TH to look at outside of meeting • Roll Out Plan – attached for info • PGN – look at PGN any comments/feedback please send to MS • Patient Information Leaflet – attached for info • Lessons Learnt – attached for info  Oxehealth Roll Out 20.03.23.xlsx  PGN - 03 - The Use Of The Oxehealth Sys  Oxevision vision draft (002).pdf  Oxevision clinical subgroup Lessons Le Action: BK and TH to review Action Log prior to next meeting	Chair
4.	<u>Install Update</u> • 5 wards are live: ○ Ashby (14.03.23) ○ Yewdale (23.03.23) ○ H1 Hadrian (24.03.23)	Chair

	○ H2 Rowanwood (slight delay – aiming for this week) ○ RADS at Gibside (WC 27.03.23) • Embleton, Warkworth, Alnmouth, contractors due to start WC 27.03.23 • Bridgewell, Springrise have encountered some issue within blind running, Bede has a delay because of cabling issues, and this has delayed the Go-live of these 3 wards. Phase 4, 5 & 6 install forecast:  Phase 4, 5, 6 forecast.pptx	
5.	<u>Functionality</u> 'Out of room' alert amendment – see Go Lives section below	ZC
6.	<u>Education and Training</u> Current position update  Current position 21.03.23.xlsx	SJ/AP
7.	<u>Go Lives</u> Live w/c 20 & 27 March: • Yewdale • Hadrian • Rowanwood • Gibside Upcoming Go-Lives: • Bede • Bridgewell • Springrise Go-live feedback Gibside is now live and HC reported early positive feedback. Some issues arose around alerts going off excessively, but the feeling is that this is just whilst patients and staff get used to system so it will be monitored for now with no adjustments. Overall staff are happy with the system and understand it will take time to adjust and get comfortable with the equipment. RH updated the group how the initial go-lives went and any challenges that were faced. Yewdale 'out of room' timing was adjusted to 11pm-6pm. This was due to the overwhelming volume of alerts going off due to patients being up and about and visible on the wards during the day. It was decided to activate the system between the hours 11pm-6am only, as these are the times patients are expected to be in their bedrooms. Following this change, it was decided to adjust the alerts to be the same on H1 and H2. H2 experienced some problems with the 'at door' alert being over-sensitive and reading patients as remaining in doorways after they had moved away from the door. Reshma proposed as the system can confidently detect from 30 seconds onwards that someone is dwelling in the doorway, that the system warns you from 30 seconds that someone is in the doorway. This would mean the system has a	TH/RH

	short amount of time to adjust and either switch off because the patient has left the room, or it will carry on confidently to a red alert after more than 3 minutes. If the group are happy with those changes, these can be made specifically to H2 only and reviewed at next meeting allowing for more feedback, or the change could be applied to all acute wards going forward from now. A lengthy discussion took place around the practicalities of timings around the 'at door' function. A group decision was made that the 'at door' timings will be changed for H1, H2, Yewdale, Longview, Shoredrift and Beckfield as follows: At door • Runs for 24 hours • No warning alert • Straight to red alert after 30 seconds Alerts will be audited for the next 2 weeks and reviewed at next meeting. RADS at Gibside will not see the above changes as this is a specialist ward and has different needs. Out of room alerts will be changed on all acute wards to: • Runs between 11pm-6am • Alerts as soon as exited Actions: • RH to adjust timings as discussed above. Expected to be in place by Friday this week. RH to provide data at next meeting showing any spikes in alerts. • SJ to update functionality slides.	
8.	<u>Risk and Issues</u> SJ to create Issues Log relating to the implementation of the system. Deviation from PGN (turned off) – Yewdale asking for 10-minute switch off for personal care. Current instructions are not to switch off the system at any time and this is the decision of the Clinical Subgroup. BK will report back to Stewart Gee.	All
9.	<u>AOB</u> None raised	All
	<u>Date and time of next meeting</u> Wednesday 12 April 2023 15:00pm – 16:00pm via MS Teams
